

9.0 Growth-Inducing Aspects of the Proposed Project

The proposed project entails the construction of a new school facility that would replace the existing PS 133 elementary school and expand capacity at the site in northern Park Slope. The new facility will provide approximately 960 seats for Pre-K through Fifth grades in two school organizations serving CSD 13 and CSD 15. The proposed project would provide more space and upgraded facilities to accommodate the two school organizations' educational programs, and would result in a net incremental increase of approximately 696 seats over the capacity of the existing PS 133 facility. The proposed project would serve students from the surrounding community and would not be expected to induce growth in the area.
